StarSeal[®] EF
ECO-FRIENDLY PRODUCTS

StarSeal EF is a complete line of products designed to protect and improve concrete and masonry while leaving a lower environmental footprint.

For over thirty years, Vexcon Chemicals has led the industry in the research, development and manufacturing of innovative products to protect and improve concrete and masonry. Today, we continue to pioneer with StarSeal EF - our next generation of products that are specifically formulated to be environmentally responsible while maintaining the high performance levels you require.

StarSeal EF products offer the architect, specifier and builder single-source building materials for use in a wide variety of applications.

Decorative Concrete
New Construction
Property Maintenance
Repair & Restoration
Flooring
Wall Coatings & Treatments
Waterproofing & Moisture Control

Design Green

- EQ, MR and EA LEED points
- Improved air quality for workers and occupants
- Reduced effects of volatile organic compounds (VOCs) on the environment
- Cost effective solutions

Specify Green

- Products that meet industry standards and specifications
- Technical experts that help you solve construction issues and make product recommendations
- A complete library of documents makes specifying and project documentation requirements quick and easy
- Products that span CSI divisions 3, 4, 7 and 9

Build Green

- Easy-to-use products
- Nationwide product availability with quick delivery
- Fast response and answers from our customer service, technical and field support experts
- Products that are safe to use and store

Curing Compounds

Products that ensure concrete properly cures and reaches its maximum strength for long term performance.

Cure & Seal Coatings

Products that cure and seal new and existing concrete surfaces. These products provide an attractive coating with protection from wear, water and other staining.

Liquid Floor Hardeners

Product systems that permanently harden and seal concrete surfaces to provide long term protection from wear and staining, reduce maintenance requirements and ensure a long life cycle.

Epoxy Coatings

Products that deliver performance and value for a wide range of environments. These long lasting, protective and decorative waterproof coatings feature Vexcon's breathable technology, are extremely durable and provide excellent resistance to wear and staining.

Water & Stain Repellents

Products that provide protection from staining and the damaging affects of weather and salts while leaving the natural appearance of the surface intact.

Vertical High Build Coatings

Products that provide excellent weather and waterproofing protection. Available in a variety of colors and textures.

Surface Preparation & Specialty Cleaners

Products that assist in cleaning, preparing and maintaining concrete and other hard surfaces.

Repair Materials & Grouts

Products that repair and restore aging and damaged concrete and masonry.

Form Treatments

Products that ensure a clean and effective release of a variety of concrete forming material types.
