

Vertical Surfaces

Wall Coatings | Stain and Water Repellents | Repair

The Vexcon line of high performance vertical masonry and architectural products provides the perfect blend of aesthetics and durability. For more than 30 years, Vexcon has originated breakthrough technologies focused on the long-term performance of concrete and masonry structures while meeting the latest government compliances. No matter what your needs are, we have you covered with complete product systems that will meet your specific project requirements.

- High performing products to build, restore, protect and maintain vertical concrete and masonry structures
- Designer color palette to accent and complement our flooring products

Concrete solutions for architects, engineers and builders since 1974

Wall Coatings

Weatherproofing

Economical weatherproofing and decorative solutions. Advanced acrylic technology provides a protective barrier from the elements for fresh or existing concrete, masonry, block and stucco while enhancing the architectural features of the structure. Features Vexcon's breathable technology which prevents color fade and loss of adhesion.

StarSeal Vertical Stain

- A ready to use water based fade resistant colored sealer that quickly forms a decorative, hard, water repellent protective film
- Enhances and revitalizes
- Good protection from moisture, salts, staining and other harmful elements

Certi-Vex Masonry Paint

- Economical general purpose coating for masonry surfaces
- Better weathering characteristics than conventional exterior paints
- Revive older coated surfaces

StarSeal 1315 Beading Flat

- Economical water base clear acrylic coating
- Matte appearance
- Non-Yellowing

Waterproofing

Decorative breathable acrylic coatings that provide years of protection from the elements. These materials will enhance the aesthetic appearance while providing superior performance, excellent adhesion, flexibility and resistance to wind driven rain, UV light, molds and mildew. VOC compliant, apply to fresh or existing, above or below grade concrete, masonry, block and stucco. Moisture resistance guarantees that the coating will not blister, peel, crack or stain.

- No primer required
- Apply to fresh concrete or alkaline surfaces
- Apply where hydrostatic water pressure is present
- Apply to fresh mortar joints
- Lower maintenance costs
- One coat application reduces application time
- Performance warranty
- Outlasts and out performs conventional paints and coatings

Certi-Vex Envio Smooth/Tex

- Weatherproof coating
- Resistant to 100 mph wind driven rain
- Available in smooth, sand or fine, medium or coarse textures
- Exceeds all the performance requirements of Federal specifications TTC-555 B and TTP-1411 for waterproofing
- Apply down to 20° F
- Bridge hairline cracks
- Hides surface imperfections
- Available in both solvent and low odor water base

Certi-Vex Block Fill

- Provides an excellent bond between porous substrates and top coating
- Fills in pores and capillaries
- Provides a uniform background and sealed surface
- Meets all the performance requirements of Federal specification TTF-1098
- Available in both solvent and low odor water base

Certi-Vex Envio Stain Blocker

- Blocks out surface blemishes and stains including water and graffiti
- Excellent base coat for Vexcon high build top coatings

Certi-Vex Guard Clear & CACS

- The original one step clear and colored acrylic/silane penetrating water repellent cure and sealers
- Deep penetration, abrasion resistance and protection from harmful salts, water and UV with a protective coating enhancing and improving the appearance of any surface
- The product can be applied to fresh and existing concrete and masonry surfaces providing greater stain and oil resistance than treated and untreated surfaces

PowerCoat Anti-Graffiti

- Fast drying two component breathable urethane high build coating that will waterproof and protect concrete and masonry from graffiti and commonly encountered acids, alkali chemicals and UV light
- Available in clear matte or gloss finishes or apply over one of our decorative high build coatings yielding a protected aesthetically pleasing and uniform appearance
- Available in both solvent and low odor water base

Product systems used for:

- Tilt-Up Construction
- Pre-Cast & Pre-Stressed Concrete
- Bridge & Parking Structures
- Road Development
- Tunnels and Underpasses
- Architectural Walls
- CMU
- Natural and Manufactured Stone
- Brick and Aggregate Walls
- Commercial, Industrial, Infrastructure and Institutional Structures

Penetrating Sealers

Water Repellents

Breathable, highly reactive premium silane-based water repellents extend the life of concrete and masonry structures. Without changing the natural appearance or texture, these products penetrate deeply into substrates providing sealed protection against the costly damaging effects of mildew, erosion from water, salts, deicing chemicals, corrosion and spalling caused from freeze/thaw cycles. These products reduce maintenance and cleaning costs.

Powerseal Weatherproof

- Good protection against surface cracking and spalling caused by repeated wet/dry and freeze/thaw cycles from water and salt penetration
- Cost effective
- General purpose
- Available in two grades to meet any budget
- Ideal for residential and commercial use

Powerseal 20%

- Better long term protection against the damaging effects of weather related conditions such as wind-driven rain, freeze/thaw cycles, moisture, mildew, chloride ion intrusion from deicing salts and airborne contaminants
- Highly effective
- Ideal for commercial and institutional use

Powerseal 40% & Penseal 244 40%

- Best long term protection against the damaging effects of weather related conditions such as wind-driven rain, freeze/thaw cycles, moisture, mildew, chloride ion intrusion from deicing salts and airborne contaminants
- Premium performance
- Available in both solvent and low odor water base
- Ideal for infrastructure and industrial use

Certi-Vex Penseal 100%

- Maximum long term protection against the damaging effects of weather related conditions such as wind-driven rain, freeze/thaw cycles, moisture, mildew, chloride ion intrusion from deicing salts and airborne contaminants
- Fast drying
- 100% silane
- Ideal for high traffic and extreme weather environments

Certi-Vex Penseal 244 BTS 100%

- Maximum long term protection against the damaging effects of weather related conditions such as wind-driven rain, freeze/thaw cycles, moisture, mildew, chloride ion intrusion from deicing salts and airborne contaminants
- Fastest dry time
- 100% silane
- Ideal for tight construction schedules that require fast return to service

Stain Repellents

Breathable protective treatments that control staining for a variety of surfaces including brick, natural and manufactured stone and architectural concrete. Protected surfaces last longer, look better and are easier to maintain. These products offer the option of enhancing the appearance of the surface with color and clear finishes, or leave the surface's natural appearance unchanged.

Powerseal Stain Guard

- An advanced weather, stain and discoloration protective treatment for hard, porous, decorative and functional surfaces
- Stain protection from salts, water, oil, dirt, and other common stains
- Also protects against the damaging effects of weather-related conditions such as wind-driven rain, freeze/thaw cycles, moisture and chloride ion intrusion from deicing salts

Certi-Vex Guard Clear

- The original one step, clear acrylic/silane penetrating water repellent cure and sealer
- Deep penetration, abrasion resistance and protection from harmful salts, water and UV with a protective coating enhancing the appearance of any surface
- The product can be applied to fresh and existing concrete and masonry surfaces providing greater stain and oil resistance than treated and untreated surfaces

Certi-Vex Guard CACS

- The original one step colored acrylic/silane penetrating water repellent cure and sealer
- Deep penetration, abrasion resistance and protection from stains, water and UV with a protective colored coating improving the appearance of any surface
- Ready to use

Certi-Vex Penseal 244 O/W

- Excellent long term protection against oil, grease and food staining, salt corrosion, water, wind driven rain, airborne contaminants and freeze/thaw cycles
- Fast drying
- Available in solvent and low VOC solvent versions

Repair Materials

Certi-Vex Rapid Patch

Rapid setting, durable, cost effective for structural repairs. Cement based, single component, resists freeze thaw cycles, excellent bonding, tensile and flexural strength

Certi-Vex Patch FP

Resurfacer for filling and smoothing vertical surface defects, excellent strength properties and adhesion, self curing

Certi-Vex Patch VO

Vertical and overhead repairs, fast setting, excellent bond and strength, resists freeze/thaw cycles

Cleaners

StarSeal Masonry & Brick Cleaner

- Effectively removes efflorescence, concrete laitance, mortar smears as well as atmospheric dirt, rust and other construction stains
- Improves brightness, depth and uniformity of colored concrete and masonry, and is safe to use on new brick, colored and gray masonry and concrete and stone surfaces

StarSeal EF Stripper V

- Eco-friendly heavy bodied stripper designed for the cleaning and removal of coatings and other residues from vertical surfaces

StarSeal EF Degreaser & Cleaner

- Eco-friendly general all purpose preparation and maintenance cleaner

StarSeal Graffiti Cleaner

- Special blend of biodegradable materials used to clean graffiti off surfaces
- Removes graffiti leaving the coating intact to continue protecting against graffiti

Notes on Color

- 30 attractive colors to choose from
- Custom color matching available
- Colors available for coatings
- See our Color Systems brochure to view our full line of flooring and vertical color design options

Actual colors may vary. This color card is intended as a guide only. Final appearance is affected by the substrate, texture, lighting, gloss and application. Prior to installing it is recommended that the applicator apply a test patch using the same surface preparation, product and application method as specified.

Customer Service & Technical Support

Get the answers and information you need from our experienced sales, technical support and customer service professionals. We can assist you with product recommendation, specification support and fast job site answers. Our customer service specialists can also expedite samples or literature, and keep you current with our status, delivery, and product availability. We're here for you. Call us toll-free 888-VEXCON1.
